PROFILE

I am a third year computer science student at Epitech, Bordeaux, France.
I am currently looking for a **4-5 month internship**, between **March** and **August 2025**. Passionate about computer science and programming, I'm interested in applying these skills to solve concrete problems in an entrepreneurial context. I'm also always looking to learn and improve, and am very adaptable and open to new experiences. I enjoy reading, traveling, baking and spending time with friends and family.

SOFT SKILLS

-> SCRUM

-> Flexible

-> Organizational

-> Collaborative

NOTABLE PROJECTS

R-type:

Re-created the R-type arcade game by implementing my own ecs game engine and graphical interface in C++ and using SFML.

Arcade :

Creation, in a group, of an "arcade" system, complete with an independent core, two SFML games, and three graphic libraries, in C++.

Gomoku :

Implementation of a Gomoku Narabe game bot with a focus on the performance of its artificial intelligence, in C++.
